DETAILED ACTION

Response to Amendment

1. This action is in response to amendment filed 8/8/2003.

REASONS FOR ALLOWANCE

2. Claims 2-6 are allowable over the prior art.
3. The following is an examiner's statement of reasons for allowance:

With respect to claims 2 & 5, Hamaguchi 6,028,458 disclose a differential amplifier apparatus comprising a present level detector (3), a HIGH level detector (5), and LOW level detector (4), but utilizes this apparatus to switch between activation and inactivation of a power supply. Hamaguchi does not disclose the use of a DC bias control circuit to find a difference between the level of a crossing point and the DC level. As a result, claims 2 & 5 are allowable over the prior art.

With respect to claims 3-4 & 6, Casper et al 5,754,577 disclose a light detection element and an integration circuit, but do not disclose a data regeneration circuit for regeneration of data from an AC component of the voltage based on a DC bias controlled by the DC control circuit. Hamaguchi does not disclose nor suggest the use of the amplifier apparatus to optical data applications.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
